

Utah DX Association  
Member Survey  
September 2005

Greetings fellow DXers. As the Utah DX Association begins its second life, the club leadership has decided to survey the club membership (and those who have expressed an interest) regarding various DX/ham radio topics. The survey results will be used as subject matter for meetings. We thank you in advance for your input and interest. The club leadership looks forward to a fun and educational experience with all of you. We have listed the topics by category. We have included blank space after each category. Use this space to add topics that you are interested in discussing. Finally, please indicate your level of interest in the rating box. Use the values of 1 to 5, with 1 being very uninterested and 5 being very interested. Thanks again for your input.

ANTENNAS

Modeling (Yagi design, HF Terrain Analysis, etc.)

Selection of most effective for purpose

Receiving antennas
